

Welcome to "Bin-Eazy", Sri Lanka's first ever household solid waste management mobile app!

User Guideline

We look forward to your support for this formal environmental care!

This is what you need to do for that...

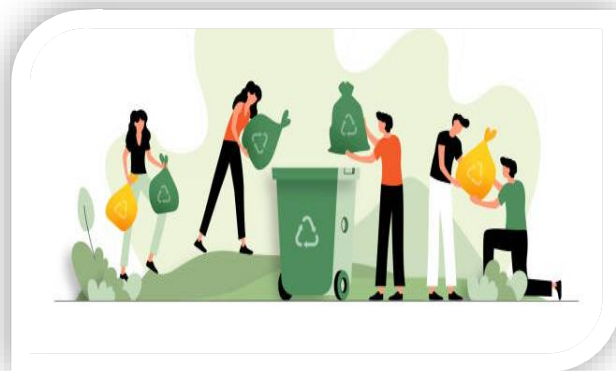

From now on, your garbage collection process will be as follows,

1. you need to provide your details and register for this mobile app.
2. After registering, log in to the mobile application using the information you provided.
3. Specify the exact location of your waste.
4. Then you must have sorted the waste to make this request.

If you are not familiar with the classification of waste, follow the instructions below,

National Color Codes for Waste Separation Containers

- ✓ Green- Organic Waste
- ✓ Blue- Paper wastes
- ✓ Red – Glass, Bottles
- ✓ Brown – Metals, Coconut Shell
- ✓ Orange – Plastic/Polythene

5. Classification as mentioned above must be done.
6. After selecting your type of waste, upload the image of the respective waste.
7. Your picture will be checked by the Municipal Council and if it is correct it will come within two days to pick it up.

***From the polythene you provide, arrange to give only meat, fish, blood-stained and used food bags after washing them with water once.**

Benefits you get from using this mobile application

As per the current system, if you are unable to dispose of the garbage on the scheduled date, you will not have to wait until the relevant date.

You can request your household waste collection from any place at any time using this mobile application.

This mobile application can be used for problems related to waste classification and recycling.

Environmental pollution and health problems caused by spoilage of food items can be avoided.

THANK YOU!!!
